Service Provider Directory

About our Service Provider Directory

Members have put forward the following Service Providers as individuals and businesses that they feel are trustworthy and provide high quality service. In some cases, where noted, fellow members are advertising their own service. NNGH has not verified the individual services offered by any of these providers and cannot be held responsible for poor workmanship or service, however, if you do have a negative experience, please advise the Board so that the individual can be removed from our listing. The purpose of this Directory is simply to provide a resource of services that can be shared among members. Each provider has been asked to pay a nominal fee for this listing.

If you have a business or individual you would like to recommend, please contact the Board for further details, as we would like to expand this Directory to encompass many other industries.

Please see the full color ads on the NNGH Website www.nngh.org and our Facebook page, NNGHfacebook.

Please remember to tell the advertisers that you found them through NNGH!
